

Wall Magazine Inauguration on 26/09/2023

The Department of Botany organized the inauguration of its Wall Magazine on 26th September 2023, with the theme “**Fungi**”. The event aimed to showcase the fascinating world of fungi, emphasizing their ecological importance, diversity, and applications in various fields.

The magazine featured an array of informative and visually appealing content, including articles, illustrations, charts, and facts prepared by the students. It highlighted the role of fungi in decomposition, medicine, biotechnology, and their ecological significance in maintaining balance in ecosystems.

The inauguration was graced by Dr. Sashadhar Kalita, Former HOD of the Department of Botany, who commended the students and faculty for their creativity and dedication to the theme. The Wall Magazine served as a platform to foster curiosity and inspire discussions about the lesser-known yet critical kingdom of fungi.

The event was a successful blend of education and creativity, reflecting the department’s commitment to promoting innovative learning and raising awareness about the natural world.
