

Field Trip to Horticultural Research Station, Assam Agricultural University,
Kahikuchi, Assam on 02.11.2023

On 2nd November 2023, the 5th Semester (Honours) students participated in an educational field trip to the Horticultural Research Station at Assam Agricultural University, Kahikuchi, Assam. This trip was organized as part of their academic curriculum to provide practical exposure to modern horticultural practices and research methodologies.

During the visit, the students were introduced to various ongoing research activities and innovative technologies in horticulture. They explored advanced cultivation techniques, pest management strategies, and the development of high-yielding crop varieties. The research station's staff conducted interactive sessions and demonstrations, enriching the students' understanding of sustainable agricultural practices.

This field trip not only enhanced the theoretical knowledge of the students but also inspired them to think critically about integrating technology and traditional practices in horticulture. It was a fruitful experience that highlighted the significance of research in advancing agricultural productivity and sustainability.
