

“Workshop on Vermicomposting” held on 16.05.2024

On 16th May 2024, a workshop on vermicomposting was conducted at North Gauhati College by Eco Club in collaboration with the Department of Botany, North Gauhati College. The workshop aimed to educate participants about the benefits and processes of vermicomposting as a sustainable waste management practice. The event saw enthusiastic participation from 116 participants, including teachers, schools, and college students. Dr. Hemen Deka, Assistant Professor, Department of Botany, Gauhati University, graced the event as the resource person for the workshop.

He delivered the visual aid presentation with a clear and concise explanation, which was very well received. He also discussed the science of vermicomposting: principles, processes, and microbial activity. A thorough discussion on building and assembling the vermicomposting system with scientific insights was also perfectly delivered by him. A further demonstration of the various applications of vermicompost in gardening and agriculture, along with vermicomposting success stories was shared.

Lastly, the live set-up of a vermicomposting bin by him was particularly popular, providing insights and hands-on experience. Many expressed appreciation for the practical knowledge gained and showed interest in starting their own vermicomposting projects. By promoting sustainable waste management practices, the workshop contributed to environmental conservation and community well-being.

Environment Education Programme
Mission LiFE in Assam

Workshop on “Vermicomposting”

Organized by
Assam Science Technology & Environment Council (ASTEC)

In collaboration with
Eco Club and Department of Botany, North Gauhati College

16th May 2024

Supported by
Ministry of Environment Forest & Climate Change, Govt. of India

Seminar Hall, North Gauhati College
