

Wall Magazine Inauguration on 5th September 2024

Theme: "Fernscape"

The Department of Botany, North Gauhati College, organized the inauguration of its Wall Magazine on 5th September 2024 in celebration of Teachers' Day. The theme of the wall magazine was "**Fernscape**", focusing on the fascinating world of ferns — their diversity, ecological significance, and aesthetic value.

The wall magazine was creatively designed and curated by the 5th Semester Honours students under the guidance of Dr. Ipsita Bhattacharjee, who mentored the students in content development, layout design, and scientific presentation.

The inauguration ceremony began at 11:00 AM in the department corridor, where faculty members and students gathered to witness the unveiling. The Head of the Department, Dr. Ruby Doley, officially inaugurated the wall magazine and commended the students for their creativity, teamwork, and scholarly approach in bringing the theme to life.

"Fernscape" featured a rich collection of hand-drawn illustrations, photographs, informative write-ups, and trivia related to pteridophytes. It also included research highlights, historical facts, and the ecological importance of ferns in forest ecosystems, especially in tropical and subtropical regions.

Students presented a brief overview of their work and shared their learning experiences while working on the project. The wall magazine was well-received and appreciated by both faculty and peers for its scientific content and visual appeal.

The event concluded with a vote of thanks by a student representative, followed by a light refreshment session.

The successful inauguration of the wall magazine not only showcased the students' academic and artistic talents but also fostered a deeper appreciation for plant diversity and collaborative learning within the department.
