

# **REPORT**

**Event: Field Trip to Khamrenga Beel, Chandrapur, Kamrup.**

**Event Date: 1<sup>st</sup> November 2025**

**Organized by:** Department of Botany.

The Department of Botany organized a one-day educational field trip to *Khamrenga Beel*, Chandrapur, Kamrup, on 1<sup>st</sup> November, 2025. The trip was conducted for the students of B.Sc. 3rd Semester (Paper: *Laboratory and Field Techniques in Plant Science*) and 5th Semester (Papers: *Plant Ecology, Phytogeography and Climate Change* and *Plant Systematics*). A total of 43 students participated in the excursion, accompanied by faculty members of the department.

The team started early in the morning by bus and private vehicles from the college campus and reached Khamrenga Beel after a short journey. The main objective of the field visit was to familiarize students with field and herbarium techniques, ecological data collection, and plant identification in their natural habitats.

During the visit, students actively engaged in the collection of various plant specimens from the surrounding wetland and adjoining areas for herbarium preparation. Faculty members guided the students in proper specimen collection, labeling, and field documentation procedures. The site also provided an opportunity to observe diverse aquatic and semi-aquatic plant species and to discuss their ecological significance and adaptations in the beel ecosystem.

After completing the field study, the team had lunch at the same location and interacted informally to share field experiences and observations. The group returned to the college the same day in the afternoon, marking the end of an enriching and informative field trip.
